

Duflon manufactures a wide range of components for diaphragm valves, including bodies, diaphragms and other moulded and machined components in a variety of materials such as fluoropolymers, polymers, elastomers and metals.

All products are custom manufactured to individual customer specifications.

Diaphragm Valve Components

Components available—fully lined or unlined

- Body
- Diaphragms
- Other machined components and seals

Lining Material Options:

- PTFE, PFA, ETFE, UHMWPE, Rubber, Modified PTFE, PP, PVDF or conductive options.

Material Filler Options:

- Ceramic, Carbon, Glass, Bronze, Carbon Graphite, MOS₂, Alumina, Boron Nitride and others.

Body / Metallic Materials:

Most grades of carbon and stainless steels, ductile irons and other alloys to meet customer specifications in accordance to ASTM, DIN or BS standards.

Size Range:

- Components for valve sizes from 1" to 12" (DN025 to DN300)

Manufacturing Processes:

- Isostatic, Injection, Compression and Transfer Moulding
- Blending
- CNC as well as Conventional Machining
- Sand & Investment Casting
- Powder Coating, Painting and Spraying
- Fluoropolymer Coating

Please contact Duflon for your specific requirements.
