

DuFlon[®]

Leading the way in Fluoropolymer Processing

Duflon manufactures rubber moulded or extruded components for a variety of industries. These are all bespoke components and Duflon is geared up to supplying from very small quantities up to quantities in millions. The secret to manufacturing a good rubber component is in the tooling, and Duflon has a team of specialist elastomer engineers who have vast experience in tool making. Rubber compounding facilities are available for manufacturing compounds to meet specific applications and conditions. Whether you have a fast turnaround pilot requirement or mass production, Duflon is able to cater all scenarios.

Rubber Moulded Components

Typical components used in industry include:

- Custom Moulded Components
- Gaskets
- Seals
- Washers
- O-Rings
- Bellows
- Diaphragms (with or without fabric)

All components are manufactured to customer drawings.

Manufacturing Processes

- Injection Moulding
- Compression Moulding
- Transfer Moulding

- Rubber Compounding
- Finishing by hand or mechanically
- In-house tool making
- Rubber to PTFE Bonding
- Rubber to Metal Bonding

Sizes: From a few 'mm' upto 2metres

Quantities: Duflon is able to support customers with a few pieces for prototype projects up to large production quantities. Fast turnaround prototype facilities are available.

Typical Materials:

- EPDM
- Nitrile (BUNA)
- Silicone
- Viton (FPM)
- Neoprene
- Natural Rubber
- Butyl
- SBR
- Polyurethane (PU)
- HNBR
- Perfluoroelastomer (eg. Kalrez[®], Chemraz[®], Simriz[®])

All products are custom manufactured to customers specific requirements.

Europe

Duflon Europe Limited
PO Box 1683,
Slough, Berkshire,
SL1 2FD,
England,
United Kingdom.
